Program Requirements and Description

Requirements

Undergraduate Program in Electrical Engineering

The Electrical Engineering Department maintains the following student learning outcomes:

An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics,

An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental, and economic factors,

An ability to communicate effectively with a range of audiences,

An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts,

An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives,

An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgement to draw conclusions,

An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

For more information visit www.abet.org.

The electrical engineering curriculum is designed to provide students with knowledge of scientific principles and methods of engineering analysis to form a solid foundation for a career in design, research and development, manufacturing and processing, measurement and characterization, or management. Students progressively build their design experience throughout the curriculum and demonstrate this ability in the senior electrical engineering design laboratories. The curriculum also introduces students to subjects in the humanities, social sciences, and ethics so they may better understand the interaction of technology and society.

The electrical engineering curriculum is divided into three phases. The first year concentrates on the development of a sound understanding of basic sciences and mathematics. The second and third years further develop scientific principles and cover the basic core of electrical engineering. The fourth year is composed primarily of senior-level elective courses. At this time, the students, in consultation with their advisers, may choose classes related to one or more of the major areas of electrical engineering detailed (e.g., analog and mixed-signal circuit design/test, biomedical, communications, computer hardware and digital circuit design, control systems, electronic packaging, embedded systems design, microwave and radar engineering, nanophotonics, nanotechnology/microelectronics/optoelectronics, pattern recognition and artificial intelligence, power electronics, and renewable energy and power). This final year permits the student to tailor a program suited to her or his individual career objectives. The graduation requirement in electrical engineering is 125 semester hours as given below.

8-Semester Plan

Electrical Engineering B.S.E.E. Eight-Semester Degree Program

The following section contains the list of courses required for the Bachelor of Science in Electrical Engineering and a suggested eight-semester sequence. See the [Eight-Semester Degree Policy](#) for more details. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites.

MATH SCIENCE/TECHNICAL ELECTIVES: **Any Engineering/Science/Math Technical Elective**, suggested classes [BIOL 1543/BIOL 1541L](#), [CHEM 1123/CHEM 1121L](#), [CHEM 3504](#), [CHEM 3603](#), [MATH 3083](#), [MATH 4443](#), [PHYS 3113](#), [PHYS 3544](#), [PHYS 3613](#), [MEEG 2703](#) or [STAT 3003](#).

10

TECHNICAL ELECTIVES are 3000 or above level courses in Math, Engineering, or the sciences after the approval by ELEG advisor. [CSCE 2014](#), Programming 2, [CSCE 2214](#), Computer Organization, and [SEVI 5213](#) Business Foundations for Entrepreneurs are allowable non-ELEG technical electives. **Courses not eligible** for technical elective credit include [ELEG 3903](#), [ELEG 3933](#) and any history courses in math and the sciences (e.g., [MATH 3133](#)).

Students should become very familiar with the Academic Regulations chapter for university requirements that apply to the electrical engineering program as well as the College of Engineering requirements (in particular the “D rule” and the “Transfer of Credit” for courses taken at another institution). Students are required to complete 40 hours of upper division courses (3000-4000 level). It is recommended that students consult with their adviser when making course selections. In addition to these graduation requirements, candidates for an electrical engineering degree must have earned a grade-point average of no less than 2.00 on all ELEG courses.

Program Goals and Objectives

Program Goals and Objectives

Program Goals and Objectives

The program educational objectives (PEOs) for the EE undergraduate program, which leads to a Bachelor of Science degree in Electrical Engineering, are to produce graduates who within three to five years after graduation:

1. Are valued as reliable and competent employees by a wide variety of industries; in particular, electrical engineering industries,
2. Succeed, if pursued, in graduate studies such as engineering, science, law, medicine, business, and other professions,
3. Understand the need for life-long learning and continued professional development for a successful and rewarding career, and
4. Accept responsibility for leadership roles, in their profession, in their communities, and in the global society.

Learning Outcomes

Learning Outcomes

The learning outcomes are

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics,
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors,
3. an ability to communicate effectively with a range of audiences,
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgements, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts,

7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Description and justification of the request

Description of specific change	Justification for this change
1) split labs from course in Circuits I, Circuits II, Electronics I and Electronics II.	1) To provide better flexibility for student in lab and course schedule.
2) Added SEVI 5213 as a technical elective.	2) Provide a path way to the entrepreneurship certificate for the undergraduates planning to go to graduate school.

Alice Griffin (agriffin) (09/08/22 2:26 pm): Updated the scheduled program review date.

Alice Griffin (agriffin) (09/08/22 2:36 pm): Rollback: Please change your response to YES for the question if the proposal impacts any courses from another college. The addition of SEVI 5213, impacts WCOB. This action will add WCOB to the approval workflow. Only submitters can impact the workflow. Thank you.
