	Scheduled Program Review Date	na	2017-2018

	Program Change Justification	Administratively correcting catalog copy for MS degree; changes approved via the old paper documentation did not make it into CIM due to the timing of migration of program information and the legacy program change approval process.	CHLP faculty believe that students who graduate in the CHLPMS should possess above average (B or better) grade in the required research component and required courses component content areas.

	Program Goals and Objectives		The B.S.E. degree program in Educational Studies is designed to allow students with an interest in a field represented in the College of Education and Health Professions to design their own individualized area of study. By working with program advisors, students can individually tailor their learning experiences to focus on alternative routes to teaching, pre-professional postgraduate study, or preparation for occupations and advanced study in unique areas not commonly allowed for in many traditional degree programs.

	Learning Outcomes		Education is a lifelong process but current academic degree programs tend to segregate perspectives on individual learning into chronological grouping. Examples of this categorization process often include early-childhood education, elementary education, secondary education, and adult education. As such, this process may create some difficulty for individuals who have an interest in more generalized training areas or for those students who may have an interest in working in education-related fields, but who are not presently interested in pursuing formal licensure-regulated positions. In essence, the program offers a segue for alternative pathways to career opportunities in education, allied health fields, or a multitude of other potential career tracks which become more readily accessible to graduates who possess a general degree in Educational Studies.
	Reason for Program Change		Making Minor Changes to an Existing Degree (e.g., changing 15 or fewer hours, changing admission/graduation requirements, adding Focused Study)
	Does Program Add/Delete Courses form Other Colleges		No
	Change Hours to Complete Program		No

	Program Change Justification		Realignment of the required coursework for the EDSTBS degree and providing specifications for the 55 elective hours required.

	Reason for Program Change		Deleting Certificate, Degree, Option, or Organizational Unit--(LON 5)
	Does Program Add/Delete Courses form Other Colleges		No
	Change Hours to Complete Program		No
	Program Change Justification		RESM would like to eliminate the RESM-M minor. The RESM major has grown to more than 275 students (from about 75 in 2008). We can no longer justify offering a minor with our current resources as students in the minor occasionally block our majors from enrolling in required courses.
