AGEC 1103	Course Last Update Effective	Spring 2016	Summer 2017
	Course Offering Term(s)	Fall	Fall
	Course Delivery Method	On campus	On campus
	Justification	The requested change is to allow the department to offer an honors section of the course with the purpose of increasing number of honors-eligible freshmen enrolling in the honors program.	The online delivery of this course will allow us to offer a University of Arkansas core class during the summer in order to serve students who are unable to schedule the course during the fall or spring semester. We would like to enable the course for online delivery beginning summer 2017. Our goal is to facilitate the increased number of students wishing to take the course. We have seen growth in enrollment in the recent past and we would like to continue this enrollment trend by offering a more flexible option to students.
	Reviewer Comments	Ikulcza Fri, 22 May 2015 23:03:29 GMT Per Terry Martin, creating an honors offering of this course does not need to go through a full approval process, and should be a minor change only, despite being a core course. Ikulcza Fri, 22 May 2015 23:03:46 GMT Workflow edited accordingly. Ikulcza Wed, 27 May 2015 23:20:28 GMT Spring 2016 is the earliest option to select from the dropdown menu of effective dates, but please add this honors course effective fall 2015

ISYS 5103	Course cip code	Data Processing and Data Processing Technology/ Technician.	Management Information Systems, General.
	Course Short Title	BUSINESS STATISTICS	DATA ANALYTICS FUNDAMENTALS
	Course Effective Status	Inactive	Active
	Course Long Title	Business Statistics	Data Analytics Fundamentals

	Course Catalog Description	(First offered Summer 2002, Formerly CISQ 5103) Analysis, summarization, and interpretation of data for use in managerial decision making. Includes descriptive statistics, probability and probability distributions, sampling, test of hypotheses, analysis of variance, and regression.	Fundamental knowledge and skills in several major areas of business data analytics. Emphasis on the management and use of data in modern organizations, intermediate advanced spreadsheet topics; relational databases SQL; and programming (such as Python).
	Course Prerequisite(s)	MATH 2043 and MATH 2053 or MATH 2053C.	MIS Director approval.
	Course Delivery Method	On campus	On campus
	Course Offering Type	Irregular	Regular
	Course Last Update Effective		Fall 2017
	Course Title/Description Change Type		Major Content Change
	Course Offering Term(s)		Fall
	Course Offering Year		Every Year
	Course Syllabus		ISYS_5103_syllabus.docx
	Justification		Fundamentals of Data Analytics content is required for today's businesses. Business and data analytics fundamental learning modules are currently incorporated into an IT Toolkit Course (ISYS 511V). It has become necessary to isolate those very specialized fundamentals in data analytics into it's unique course.
	Course Additional Notes		Thank you
	Reviewer Comments		lkulcza Thu, 09 Feb 2017 22:12:37 GMT Rollback: Please select the non-credit lab option if this is truly a lecture/laboratory class.
LAWW 607V	Course Effective Status	Inactive	Active
	Course Catalog Description	Study of the legal principles involved in problems which have connections with two or more states requiring a choice of law, choice of law in federal courts, and jurisdiction in multi-state situations.	Study of the legal principles involved in problems which have connections with two or more states requiring a choice-of-law, choice-of-law in federal courts, and jurisdiction in multi-state situations.
	Course Last Update Effective		Fall 2017
	Course Title/Description Change Type		Minor (stylistic/editorial) Change
	Course Academic Level		Law
	Course Delivery Method		On campus
	Course Syllabus		Conflict of Laws Trammell - Fall 2016.pdf
	Justification		Reactive course number because course is being offered by new faculty member.
