Program Goals and
Objectives

Program Goals and Objectives
1. Students will demonstrate knowledge of biological, neurological, acoustic, and psychological bases of speech, language and swallowing. **2. Students will demonstrate knowledge of normal development of speech, language, and hearing across the lifespan.** **3. Students will demonstrate knowledge of the effect of cultural and linguistic differences on communication.** ~~n/a~~

Learning Outcomes

Learning Outcomes
1. Describe the anatomy, physiology, and neurological bases involved in the production and reception of speech and language. **2. Interpret acoustic and aerodynamic measures of speech.** **3. Identify normal developmental milestones for speech and language.** **4. Describe the effect of normal aging on speech, language, cognition, hearing, and swallowing.** **5.Distinguish speech and language differences that may be attributed to culturally and linguistically diverse populations.** ~~n/a~~

Description and justification of the request

Description of specific change	Justification for this change
Change the name of degree to Communication Sciences and Disorders and the degree designation to B. S.	There is an increased emphasis on science and research in the fields of speech-language pathology and audiology. The changed title of the major and name of the degree reflect the educational and professional standards of the field with which our bachelor's degree is aligned. These proposed changes are also consistent with the titles of majors and degrees at peer institutions. These changes will more effectively reflect the educational preparation of our students and be beneficial as they apply to graduate and professional schools.
